EXPERIENCE

Founder & full-stack developer

Bitized

Mar 2019 – Present
The Hague, The Netherlands

- Novar: Built three interconnected platforms for a green energy company operating across four countries. What took days now takes minutes.
- Eco Wash: Custom scheduling system for 30+ employees. Reduced planning time from 14 hours to 5 minutes.
- Vigilante: Rescued a stalled project and built a subscription platform now serving 100,000+ readers.
- Greensolver: Custom data platform processing 1.5 billion signals per year across 49 wind parks. 6+ years in production.

Android Developer

Hanze University Groningen · Internship

Feb 2018 – Jun 2018
Groningen, The Netherlands

- Built mobile application integrating with wearable device to collect real-time heart rate data for stress level assessment.

Back-end Developer

Hanze University Groningen · Internship

Feb 2017 – Jun 2017
Groningen, The Netherlands

- Built an interactive recipe builder using Laravel allowing users to create custom meals from available ingredients.

PHP Web Developer

Digizijn · Internship

Nov 2015 – Feb 2016
Meppel, The Netherlands

- Performed an audit of existing web applications built on Yii framework, documenting current architecture and potential compatibility issues.
- Used audit findings as input for creating a detailed migration roadmap outlining the upgrade process.

EDUCATION

Bachelor of Applied Science - BAsC, Informatica (Software engineering) / Hogere opleiding Software engineer

Hanze University Groningen

2014 – 2018
